A big thank you to all the Helpers on the Colour coded courses. Despite very wet conditions the team performed wonders to provide the side show to the main event. To help the flow of entries courses were marked on the maps and handed out as required, thus saving the need for runners to mark up their own maps. Perhaps the biggest challenge was matching the soggy, disintegrating control cards to the stubs as people finished. Now with even small events using electronic punching people have quickly forgotten that control cards need protection from the wet. Despite the conditions some 60 plus competitors braved the weather and even seemed to enjoy the challenge.
